To Whom It May Concern:

We would like to extend our appreciation to Ken Anderson and his crew for doing a survey of our property in the San Carlos hills that was challenging at best, given the history of our canyon and the previous surveys done by others that did not coincide with one another. Ken Anderson's survey was extremely critical in resolving a boundary dispute with our neighbor. Ken was part of a collaborative effort that determined the true boundary of our property during an extensive legal process. Ken took extra time to write an eloquent letter to the county, which explained his methodology for determining the correct boundary corners, and which provided considerable historical data on the parcel developments in our canyon. In addition to this, he later did a smaller survey of a portion of our property that facilitated us in getting a permit to extend our driveway onto county property. His expertise, professionalism and attention to detail far exceeded our expectations and we are extremely grateful for all of his assistance. He comes highly recommended.

Sincerely

MARINA MORILLA
